HOW TO SOLVE A MURDOKU LOGIC PUZZLE

Welcome, Detective. Each case presents a mysterious crime with four primary suspects, four possible weapons, and four crime scenes. Your objective is to examine the testimonies, physical evidence, and forensic clues to eliminate impossibilities and deduce the sole perpetrator.

1. Read the Case Briefing	Carefully note the victim, time of incident, and the physical surroundings.
2. Use the Logic Matrix	Place an 'X' in the grid when a relationship is impossible. Place an 'O' when confirmed.
3. Follow the Law of Elimination	When three suspects are eliminated from a weapon or location, the remaining one must be the perpetrator.
4. Check the Solution Key	Full case autopsy and explanations are cataloged on pages 43–50.

COMMERCIAL RESALE LICENSE (BUYER RIGHTS)
